Thomas Mann: He observed, he considered. Writing not only novels, the German born Nobel Prize Winner of 1929 became even more famous while being in Exile after 1933, whilst looking at and commenting on the turbulences of mid 20th century from the US or Switzerland.

Thomas Mann's views can be re-discovered nowadays. Seen from a 2025 perspective, his observations, his perceptions and analyses can be transformed into the present.
